

Advanced Breast Examination Trainer

A wearable, dual-breast simulation model designed for realistic clinical breast examination training. Featuring interchangeable nipples and varied pathologies for comprehensive diagnostic practice in a lifelike setting.

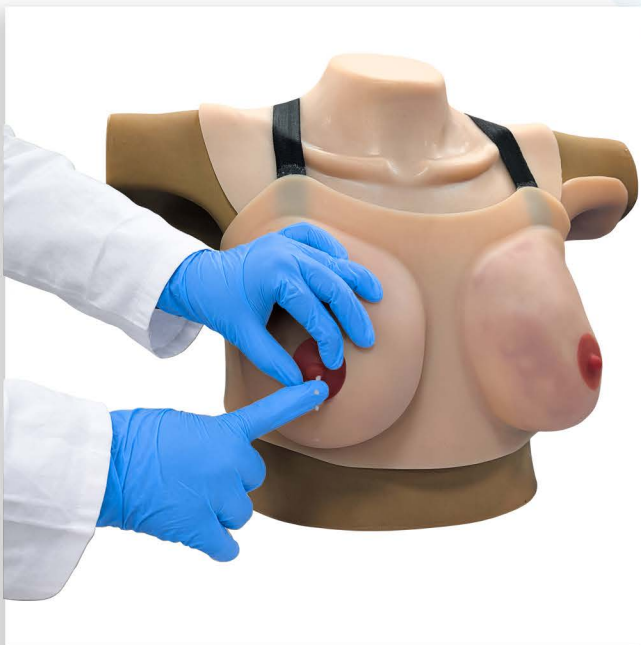

Features

- Interchangeable and multi-positional pathologies including carcinomas, cysts, fibrocystic disease and fibroadenoma.
- Suitable for self-examination of breast cancer and as an educational model for doctors, nurses and trainees, made of soft silicone material with a realistic human breast-like feel.
- Simulates different symptoms of breast cancer including hard and soft lumps, lymph node metastasis, nipple changes and peau 'd' orange peel like skin changes for comprehensive training.
- Allows for the identification of anatomical landmarks, lymph nodes (axillary, supra and infraclavicular), and location and diagnosis of pathologies.
- Customisation of metastatic and benign stages.

Skills Gained

- Develops systematic clinical skills for performing thorough breast examination using correct inspection and palpation techniques.
- Enhances ability to identify normal breast anatomy and recognize abnormal findings such as lumps, masses, and tissue changes.
- Builds confidence in practicing patient positioning, examination sequence, and communication during sensitive clinical assessments.
- Improves tactile sensitivity and accuracy in detecting variations in texture, size, and consistency of breast tissue.
- Strengthens clinical decision-making skills for early detection and appropriate referral based on examination findings.

REVOLUTIONIZING MEDICAL TRAINING WITH CUTTING EDGE SIMULATORS

Maverick Simulation Solutions Ltd. is a trusted medical simulation company advancing healthcare education through the design, manufacturing, and deployment of state-of-the-art simulators. Led by experts across engineering and clinical domains, we deliver innovations that measurably improve training quality, learner competency, and patient safety.
