

Infant Intravenous Leg

An Infant IV leg task trainer designed to help healthcare professionals practice Intravenous access and IV procedures enhancing clinical skills, accuracy and confidence.

Features

- Realistic skin crafted from premium silicone, our task trainer replicates an infant's skin, providing a truly lifelike feel & appearance of tactile experience.
- Exceptional durability designed to withstand repeated needle insertions without leakage, ensuring a long-lasting training tool.
- Precise venous anatomy with accuracy, it includes small saphenous veins, great saphenous veins, the dorsal venous arch of the foot, and tributaries.
- Trainees can feel the veins under the skin.
- Realistic color of the veins featuring true-to-life color.
- Compatible with all IV devices of size 24 and 26G.
- Choose from two simulator legs, one with a DIVA score of 2 and the other with a more challenging DIVA score of 4.

Skills Gained

- Learners will learn various hand positions to prevent rolling of veins during practice, ensuring better skill development.
- Transilluminate veins are capable to utilize the transillumination test for optimal vein visualization.
- Trainees can experience realistic resistance as the needle touches the vein, with a noticeable give-away sensation upon entry into the vein cavity.
- Our task trainer allows practice for venipuncture, IV cannulation, IV medication and IV fluid administration.

REVOLUTIONIZING MEDICAL TRAINING WITH CUTTING EDGE SIMULATORS

Maverick Simulation Solutions Ltd. is a trusted medical simulation company advancing healthcare education through the design, manufacturing, and deployment of state-of-the-art simulators. Led by experts across engineering and clinical domains, we deliver innovations that measurably improve training quality, learner competency, and patient safety.
