

Single Breast Examination Trainer

A standalone breast model mounted on a stable stand for focused examination practice. Includes interchangeable nipples and multiple pathology inserts for targeted skill development in breast assessment.

Features

- Made of high-quality medical grade silicone, to provide touch and feel of actual human skin which mimics the feel of real breast tissue.
- Single breast design for focused and detailed training.
- Ensures stability during practice.
- Inserts of varying sizes for diverse scenarios.
- Replaceable nipples: Normal nipple, nipple with retraction, nipple with secretions.
- Skin texture is highly realistic with orange peel appearance in one quadrant.
- Variety of inserts: Cyst, Abscess, Fibroadenoma, Fibrocystic Disease, and Cancer.
- Inserts can be positioned in different quadrants and depths.

Skills Gained

- Palpation techniques can identify cysts, abscesses, and tumors.
- Trainees can differentiate between benign and malignant conditions.
- Recognizable abnormalities like retraction and secretions during nipple examination
- Master comprehensive breast evaluation through quadrant and depth analysis.
- Develop confidence in performing accurate breast examinations.

REVOLUTIONIZING MEDICAL TRAINING WITH CUTTING EDGE SIMULATORS

Maverick Simulation Solutions Ltd. is a trusted medical simulation company advancing healthcare education through the design, manufacturing, and deployment of state-of-the-art simulators. Led by experts across engineering and clinical domains, we deliver innovations that measurably improve training quality, learner competency, and patient safety.
