

Suture Pad

A durable and reusable pad for practicing suturing techniques across different wound types. Supports skill development in incision closure and tissue handling.

Features

- This pad features three layers -
 - Mimicking Skin.
 - Subcutaneous Tissue.
 - Muscle For Unmatched Realism.
- Experience lifelike tissue response, drag, and strength similar to human skin.
- Dimension - 17cm x 11cm x 0.9cm; Cuts - 23.
- Superficial skin layer - 3mm.
- Subcutaneous tissue - 3mm.
- Muscle tissue - 3mm
- Create custom incision to meet your specific training needs. For durability and strength, a mesh is placed between muscle and subcutaneous tissue.
- Can be customised as per the user requirement.

Skills Gained

- Mastery of multiple suturing techniques including interrupted, continuous, deep, buried, and subcutaneous sutures.
- Improved needle handling, precision, and hand-eye coordination.
- Ability to manage different wound shapes and incision patterns effectively.
- Development of proper tension control and knot-tying techniques.
- Realistic tissue handling and tactile feedback interpretation.
- Improved efficiency and consistency in suturing procedures and strengthening aseptic technique and overall procedural accuracy.

REVOLUTIONIZING MEDICAL TRAINING WITH CUTTING EDGE SIMULATORS

Maverick Simulation Solutions Ltd. is a trusted medical simulation company advancing healthcare education through the design, manufacturing, and deployment of state-of-the-art simulators. Led by experts across engineering and clinical domains, we deliver innovations that measurably improve training quality, learner competency, and patient safety.
