

Toe Task Trainer

The Toe Task Trainer is a practical, easy-to-use model designed for basic training in common toe procedures. It provides learners with a safe platform to practice wound care, nail removal, and debridement techniques, including management of ingrown toenails, before performing them in real clinical settings.

Features

- Anatomically accurate toe model replicating nail bed and surrounding soft tissue.
- High-grade silicone construction for durability and repeated procedural use.
- Realistic nail plate and tissue resistance for lifelike training experience.
- Designed for partial and complete nail avulsion practice.
- Supports procedures like wedge resection and nail edge removal.
- Replaceable nail components for extended usability and cost efficiency.
- Easy setup, cleaning, and maintenance for continuous training sessions.

Skills Gained

- Ingrown toenail assessment and procedural planning.
- Nail avulsion techniques (partial and total).
- Instrument handling and precision control.
- Local anaesthesia administration technique (digital block concept).
- Aseptic technique and infection control practices.
- Tissue handling and minimal trauma approach.
- Post-procedure care and dressing application.
- Nail biopsy procedure can be performed.

REVOLUTIONIZING MEDICAL TRAINING WITH CUTTING EDGE SIMULATORS

Maverick Simulation Solutions Ltd. is a trusted medical simulation company advancing healthcare education through the design, manufacturing, and deployment of state-of-the-art simulators. Led by experts across engineering and clinical domains, we deliver innovations that measurably improve training quality, learner competency, and patient safety.
