

Anatomage® TABLE

What is the Anatomage Table?

- A 7-foot-long virtual dissection table with interactive touchscreen technology that amplifies the experience of working with real cadavers
- Includes the most advanced digital reconstructions of real human bodies
- Offers dynamic simulations of real-anatomy-based functional physiology and clinical procedures for medical education and training

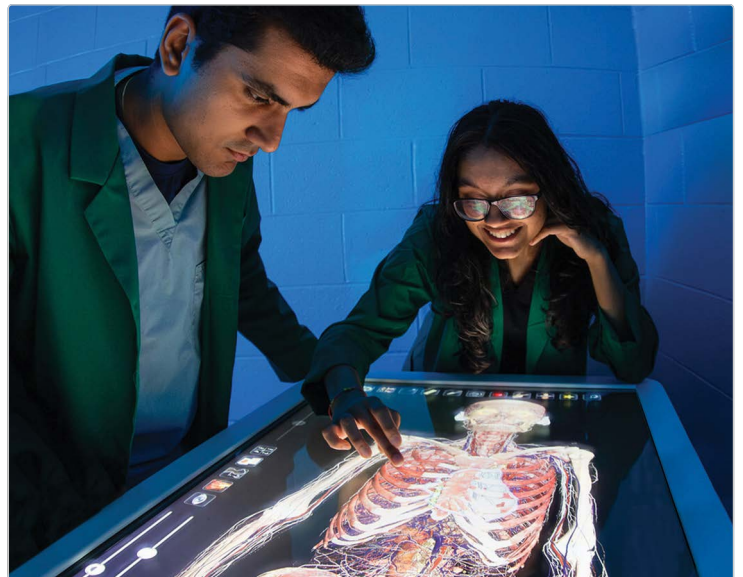

What Makes the Anatomage Table Unique

- The most accurate and detailed collection of digital real human cadavers, continuously refined for over a decade
- Functional anatomy, clinical procedure simulations, and a large pathological collection for education and healthcare
- Annual content updates free of charge for Anatomage Table customers
- Dedicated regional teams for customer support, repair, or replacement services

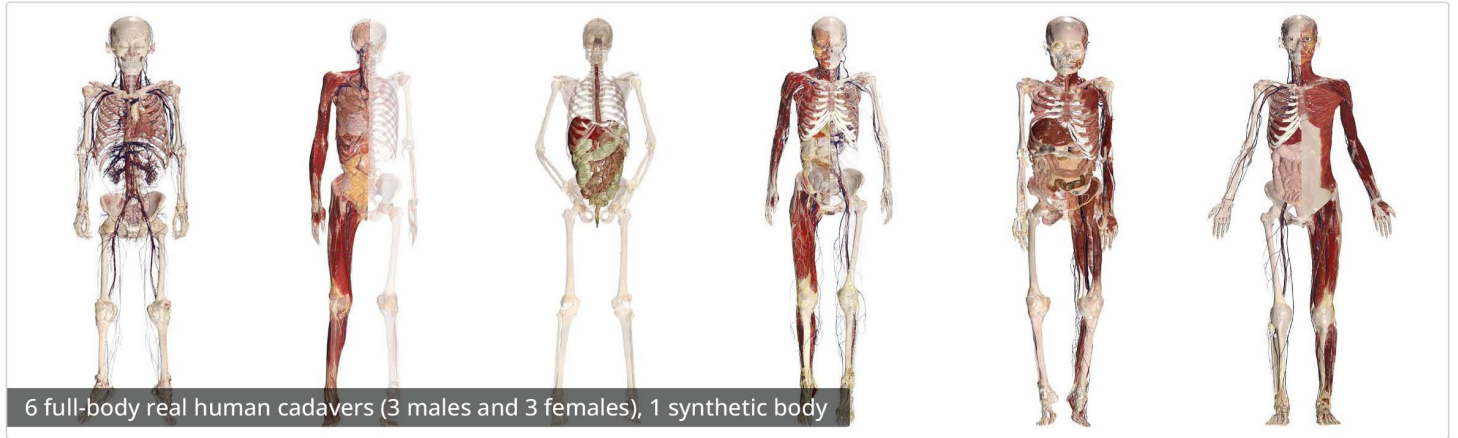

Our Technology

Founded in 2004, Anatomage is a 3D medical imaging software company and a pioneer in the digitization of human bodies. Our innovations have set new standards in volumetric visualization and image segmentation — delivering the most advanced reconstructions of real human bodies, uniquely augmented by dynamic simulations in functional anatomy and clinical procedures.

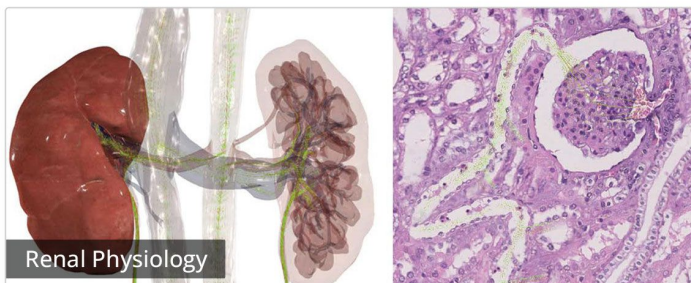

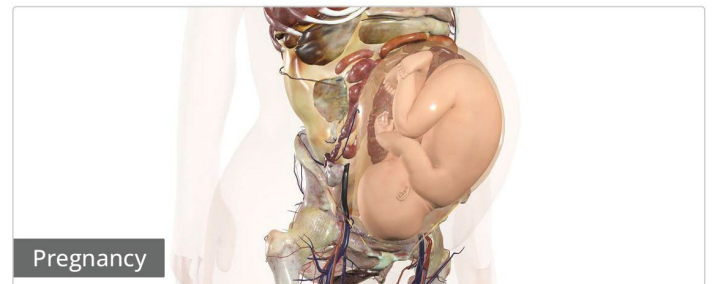

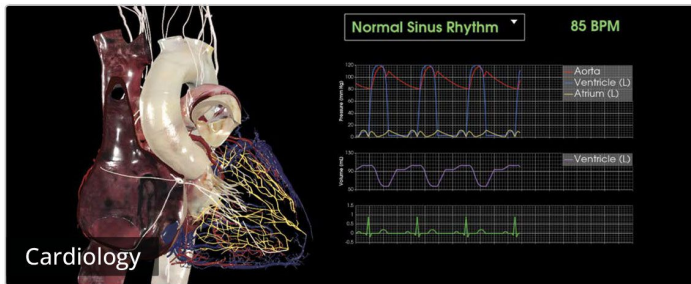

With true volumetric data and real tissue color at ultra-high resolution, we provide unprecedented anatomical detail and accuracy for medical education and clinical training, with annual additions and continuous refinements year after year. Today, Anatomage's products have been adopted by more than 4,000 healthcare and education institutions, establishing us as the market leader in the industry.

Gross Anatomy

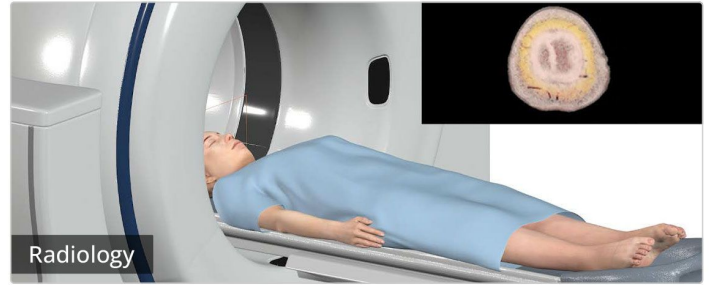

Real-time Physiology

Also Includes:

- Birth Simulation
- Dental Arch
- Developmental Anatomy
- Facial Expressions
- Homeostasis
- Kinesiology
- Neurology
- Ocular Applications
- Pathways
- Respiration

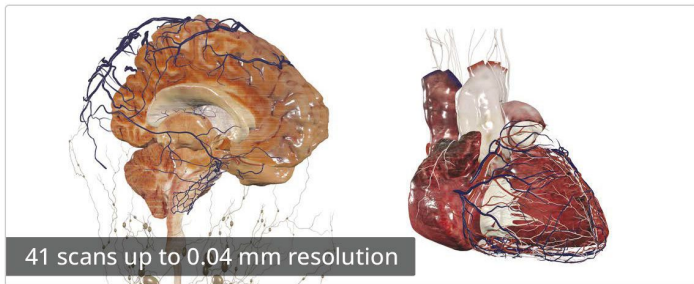

Clinical Procedures

Also Includes:

- Aesthetic Medicine
- Arthroscopy
- Colonoscopy
- Endoscopy
- Injection Procedures
- Radiation Oncology, and more
- Angiogram
- Catheterization

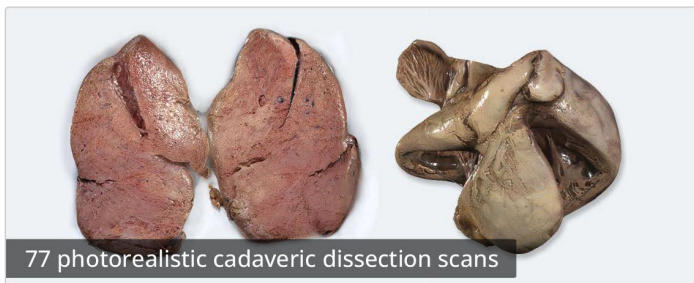

Regional Anatomy

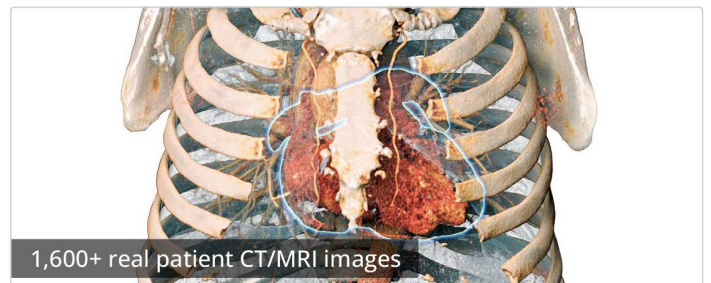

Histology

Prosections

Case Library

The Anatomage Table is so incredibly impactful... for our learning outcomes, for our curriculum. The class that we teach is so much better than it could have been without the Tables.

— Timothy Woods

Assistant Professor, North Central College

Applications

- Virtual cadaver lab that saves cost and time
- Lecture aid that improves learning outcomes

- Self-directed learning for increased student retention
- Technology showcase establishing leadership in innovation

- Enhanced training with real-human-based simulations
- Digital reference using a rich clinical database

- Assistance in diagnosis to advance patient care
- Patient communications with high-quality 3D visualizations

Authorised Partner Of Anatomage Table
