

Infant Intramuscular Leg

Realistic infant leg model designed for safe and effective intramuscular injection practice. Helps learners develop confidence and accuracy before performing procedures on real patients.

Features

- Anatomically accurate infant leg design.
- Realistic skin and tissue feel.
- Durable and reusable construction.
- Suitable for nursing and medical training programs.
- Easy to clean and maintain.
- Designed for repeated injection practice without compromising performance.

Skills Gained

- Intramuscular injection technique in infants.
- Correct site identification and needle placement.
- Safe medication administration practices.
- Hand-eye coordination and procedural confidence.

REVOLUTIONIZING MEDICAL TRAINING WITH CUTTING EDGE SIMULATORS

Maverick Simulation Solutions Ltd. is a trusted medical simulation company advancing healthcare education through the design, manufacturing, and deployment of state-of-the-art simulators. Led by experts across engineering and clinical domains, we deliver innovations that measurably improve training quality, learner competency, and patient safety.
