

3D INNOVATION & SOFTWARE PORTFOLIO

From Imagination to Immersive Visualization

ABOUT US

Maverick Solution & Consultancy Pvt. Ltd. always believed in introducing new technology into the Indian Industry. We are the one of the First entrant to introduce 3D designing, 3D printing and Reverse Engineering in the field of Automobile and Aerospace Sector. Building on our continued success, we expanded our portfolio with more sophisticated and state-of-art products into our offering. We soon achieved the PLATINUM partner status of Keyshot Studio and became the Authorized Reseller of Rhino 3D software in 2013 and continued to be the pioneered in providing the Sales and support to various Industries PAN India.

Why Choose Maverick Solution & Consultancy Pvt. Ltd.

At Maverick Solution & Consultancy Pvt. Ltd., we are committed to delivering more than just cutting-edge software solutions. We offer comprehensive after-sales support, ensuring that our clients always have expert guidance at their fingertips. Our cost-effective pricing provides exceptional value without compromising on quality, allowing businesses to stay within budget while accessing top-tier technology.

In addition, our on-demand training services empower teams to fully maximize the potential of the tools we provide, enhancing both productivity and creativity. With a client-focused approach, we prioritize long-term partnerships and continuously adapt our services to meet the evolving needs of your projects.

Choose Maverick Solution & Consultancy Pvt. Ltd. for a seamless, efficient, and rewarding experience at every stage of your journey.

KEYSHOT STUDIO

AI-Powered Product Visualization & Rendering Platform

Transform CAD models into stunning photoreal visuals with next-generation AI workflows, real-time rendering, intelligent editing, and high-performance visualization tools.

Features:

- AI shots
- AI image editing
- Real-time rendering and GPU acceleration
- High performance workflow

AI SHOTS

AI Shots enables designers to instantly generate photorealistic product visuals using AI-powered workflows while preserving original CAD geometry and design intent.

Key Highlights:

- AI-powered scene generation
- Prompt-based visualization workflow
- Preserve original CAD accuracy
- Faster concept exploration
- Local AI processing for enhanced privacy
- Generate multiple creative variations instantly
- Smart product visualization workflow

AI Image Editing

Enhance, transform, and refine renders instantly with integrated AI editing capabilities designed for faster creative workflows.

- **Transform:** Modify product appearance and visual style using AI prompts.
- **Replace:** Select and intelligently replace specific objects or areas.
- **Upscale:** Enhance image resolution with AI-powered upscaling.
- **Background Generation:** Generate realistic studio, lifestyle, or creative environments instantly.

Real-time Rendering and GPU Acceleration

KeyShot Studio 2026.1 delivers improved rendering speed, smoother workflows, and enhanced GPU acceleration for faster project execution.

Key Highlights

- Faster rendering performance
- Improved GPU optimization
- NVIDIA RTX acceleration support
- Apple Silicon optimization
- Enhanced animation workflow
- Reduced rendering time
- Smoother viewport interaction

High Performance Workflow

Designed to improve productivity, flexibility, and creative efficiency.

- **Gallery View:** Organize and manage render outputs more efficiently.
- **Custom Pivot tool:** Improved animation precision and control.
- **Move Tool Sync:** Better real-time synchronization with geometry.
- **OpenPBR Support:** Advanced material compatibility for enhanced realism.

Complete Visualization Through Plug-Ins

- **KeyShot Web:** Share interactive visual content across devices and platforms.
- **KeyShot XR:** Create immersive 3D, AR, and VR experiences.
- **Network Rendering:** Accelerate rendering performance using distributed computing.
- **KeyShot Plugins:** Seamless integration with major 3D and CAD software.

SYSTEM REQUIREMENTS

KeyShot runs on Windows, Mac and Linux - desktop and laptop computers with:

KeyShot for Windows

Hardware

- 64-bit Intel or AMD processor with SSE4.1 or higher
- Quad-core CPU
- Minimum: 4 GB RAM
- Recommended: 16 GB RAM and up
- OpenGL 2.0 capable system
- 1080p / 15.6" display or higher

GPU Requirements

NVIDIA GPU Mode

- Maxwell architecture or higher
- Recommended architecture is Turing or newer
- Ideally at least 8 GB dedicated VRAM

Supported Consumer / Gaming Cards

- GeForce RTX 20-Series
- GeForce RTX 30-Series
- GeForce RTX 40-Series
- GeForce RTX 50-Series
- TITAN RTX

Driver Requirements

- Minimum NVIDIA driver version: 576.52
- Driver version 591.44 or newer is recommended if experiencing performance issues or freezes

AMD GPU Mode

- RDNA 3 architecture and newer
- Radeon RX 7600 or above
- Minimum AMD driver version: 23.30

AI Shots Requirements

- NVIDIA RTX GPUs released within the last three years are recommended
- At least 16 GB VRAM recommended
- Newer GPUs with higher VRAM provide better performance
- AI Shots can run on CPU, AMD (RDNA3 and newer dedicated GPUs), and Apple Silicon GPUs, but NVIDIA GPUs provide the best performance
- Available VRAM determines the maximum image generation resolution

Not Supported

- Intel GPUs for GPU Mode

Windows Operating Systems

- Windows 11
- Windows 10 (22H2 or later)
- Windows Server 2019
- Windows Server 2022

Internet connection for :

- Product activation

Supported Professional / Workstation Cards

- RTX A2000 to A6000
- Quadro GV100
- Quadro GP100
- Quadro P400+
- Quadro P1000+
- Quadro P3200+
- Quadro M2000+

Multi-GPU Support

- GPU memory scaling supported through NVIDIA NVLink
- Multiple NVLink-connected GPUs can provide combined GPU memory
- Multiple GPUs supported for improved performance
- Memory sharing is not supported
- AMD MGPU and CrossFire are not supported

Notes

- KeyShot utilizes all available CPU cores; more cores and threads provide faster rendering performance.
- Certain user interface elements require GPU support for OpenGL 2.0 or higher.
- Blackwell GPUs require a CUDA update included in KeyShot Studio 2025.3 and later.

KeyShot for Mac

Hardware

- Apple Silicon processor
- Minimum: 4 GB RAM
- Recommended: 16 GB RAM and up
- OpenGL 2.0 capable system
- 1080p / 15.6" display or higher

macOS Operating Systems

- macOS Sonoma 14
- macOS Tahoe 26

Internet connection for :

- Product activation

AI Shots Requirements

- Apple Silicon GPUs are supported
- At least 16 GB memory recommended for best performance
- Available GPU memory determines maximum image generation resolution

Notes

- KeyShot utilizes all available CPU cores for rendering performance.
- Certain user interface elements require GPU support for OpenGL 2.0 or higher.

Not Supported

- macOS Ventura 13 is no longer officially supported

KeyShot Network Rendering for Linux

Hardware

- 64-bit Intel or AMD processor with SSE4.1 or higher
- Quad-core CPU
- Minimum: 4 GB RAM
- Recommended: 16 GB RAM and up

Linux Operating Systems

- Ubuntu 18.04 LTS (5.4 kernel)
- Ubuntu 21.04 (22.04 kernel)
- Other distributions with glibc version 2.23

Internet connection for :

- Product activation

Notes

- Linux support is available for Network Rendering only.

DRIVING INNOVATION THROUGH INDUSTRY-LEADING DESIGN SOLUTIONS

Maverick Solution & Consultancy Pvt. Ltd. empowers organizations with world-renowned 3D design, rendering, visualization, and animation solutions. Backed by industry expertise and strategic technology partnerships, we help businesses accelerate innovation, optimize workflows, enhance product development, and achieve design excellence
